

Announcing the publication of... Checklist and Atlas of the Vascular Flora of West Virginia

by Paul J. Harmon, Donna Ford-Werntz, and William Grafton

This 381-page printed document includes a series of completely revised lists of the vascular plants known to occur outside of cultivation in West Virginia.

County dot maps indicate from which counties each of the 2,503 taxa is recorded. Open and solid dots indicate whether each was recorded after 1976 or not.

Botanists, ecologists, foresters, biologists, land managers, naturalists, horticulturalists and gardeners will all find this book extremely valuable, providing ...

- a reference to names and classification of all the ferns, trees, wildflowers and other vascular plants and the counties in the state in which they occur;
- which species are native, introduced, adventive, or exotic;
- which are classified as wetland species, which may be invasive to natural areas;
- those needing further field work,
- those needing systematic study, and
- those tracked by the West Virginia Natural Heritage program as state rare.

Each book is a spirally-bound, 8.5 x 11 inch formatted document suitable as a field reference or an addition to one's library or herbarium shelf. Inside front and back covers hold a table of abbreviations and icons found throughout the book, and an index map of the counties of West Virginia.

The entire work is indexed on common names, current scientific names as well as the scientific names used in the classic manual, *Flora of West Virginia* by P. D. Strausbaugh and Earl L. Core (Seneca Books, Inc., Morgantown, WV, 1977).

Color-coded Sections include:

- Checklist by Division, Class, Family and Scientific Name
- Exotic and Introduced Taxa Not Confirmed as Naturalized
- Reported Taxa Not Documented as Part of the Flora
- Taxa Excluded From the Checklist
- Atlas of the Native and Naturalized Vascular Flora

Cost: \$20 each, including shipping and applicable taxes

To get your copy send check (made to WVDNR) with order to:
